

PRGX Webinar: The Overlooked Benefits of Recovery Audits

September 30, 2020

Audit experts offer finance, procurement and retail professionals insight on how to conduct a root-cause analysis to identify and minimize profit leakage within their source-to-pay cycles

ATLANTA, Sept. 30, 2020 (GLOBE NEWSWIRE) -- PRGX Global, Inc. (Nasdaq: PRGX), a global leader in recovery audit and spend analytics services, announced its recent webinar, "The Overlooked Benefit of Recovery Audit," is now available for viewing.

The primary goal of any recovery audit program is to identify profit leakage and bring it back to a company's bottom line. While immediate recoveries provide significant value, recovery audits also uncover critical information and insights that can yield a greater long-term return on investment.

PRGX's webinar on the overlooked benefits of recovery audits examines how finance and procurement leaders can enhance the value of their recovery audit programs by conducting root-cause analyses. Hosted by PRGX Audit Director Richard Jackson and UK Retail Operations Director Nick Williams, the webinar explains how to better understand recovery audit analysis reports and strategies to adopt a preventative approach to recovery audits by identifying profit leakage at its source.

"Technology continues to offer deeper, wider views into companies' source-to-pay data and the root causes of profit leakage," said Williams. "It is this type of preventive mindset that will elevate recovery audit programs and create new opportunities for finance leaders to improve internal processes and maximize profit margins."
